

ENVIRONMENTAL POLICY

Kasthall is ISO14001 certified and we design, produce, import and market high quality and designed rugs and floors for private and public spaces.

Environmental responsibility strongly influences our production methods and the company's future development. Our environmental consideration is linked with our quality thinking and we work with continuous improvement of our environmental impacts.

We shall

- continue our work to constantly improve our environmental work so that the effect on the environment is as little as possible.
- follow relevant laws and other environmental requirements.
- keep employees, suppliers and customers informed about our environmental policy and efforts.

To achieve this

- we choose raw materials and packaging that minimize the impact on the environment.
- we carry out environmental assessments of investments and production methods before implementing them.
- we give preference to suppliers who show considerations for the environment.
- we work to continuously reduce resource consumption by reducing energy use and minimize waste.
